

Request for Quotations

Shell Jewelry Making Kits

The Tuvalu Fisheries Authority (TFA), implementing the New Zealand funded Tuvalu Fisheries Support Programme Phase 3 (TFSP3), is seeking quotations for supply of materials and equipment for a training programme in the making of shell jewelry.

The equipment required is listed in the attached Excel spreadsheet. Note that quantities are provided for one kit, and that ten kits are required in total. Interested suppliers should quote for all listed equipment, which should be shipped at one time. Note that quotations must include freight to Tuvalu and an estimated date of delivery. There may be penalties for delivery that is significantly later than the estimated date.

The list of requirements provides an online link for all items proposed. **It is not necessary to purchase the items from this website – the link is just provided to illustrate items that would be suitable for the requirements of the project.** Suppliers may propose alternative makes, models and suppliers provided they meet the basic requirements. They should provide these details in the comments section of the spreadsheet.

Otherwise please enter prices in **Australian Dollars (AUD)** in the attached table and send by email to the Project Manager Noa Petueli Tapumanaia email opetaia.noa@gmail.com before 4.30 p.m. local time on Friday 10th October.

Any questions can be directed to the technical adviser Michael Batty email michaelb@tuvalufisheries.tv
